Docket No.: HI-0157

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of

Confirmation No.: 9656

Hyeong Seog KIM

Group Art Unit: 2618

Serial No.: 10/620,620

Examiner: Nguyen, Tu X.

Filed: 7/17/2003

Customer No.: 34610

For: POWER MANAGEMENT METHOD AND APPARATUS OF WIRELESS
LOCAL AREA NETWORK MODULE IN COMPUTER SYSTEM

SUBSTANCE OF THE INTERVIEW

U.S. Patent and Trademark Office
Customer Service Window
Randolph Building
401 Dulany Street
Alexandria, Virginia 22314

Sir:

Applicant gratefully acknowledges the courtesies extended by Examiner Nguyen during the personal interview on March 20 with applicant's representative, Mr. Oren. This document serves as the Substance of the Interview.

During the interview, applicant asserted that each of independent claims 1, 21 and 24 were patentable over the applied references. Applicant asserted that U.S. Patent 6,192,230 to Van Bokhorst did not teach or suggest the respective features of the claimed wireless communication device to check a sensitivity of at least one communication channel and to change a power mode of the wireless communication device as recited in independent claim 1

Serial No. 10/620,620

Attorney Docket No. HI-0157

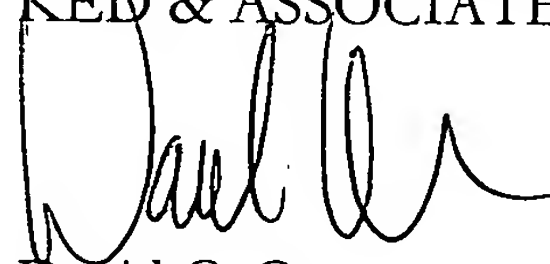

(and similarly recited in independent claim 21). Applicant also asserted that independent claim 24 was also allowable for at least similar reasons.

The Interview Summary states that the Examiner agrees the amended claims overcome the cited reference Van Bokhorst.

Applicant further believes that the March 8 amendments should be entered since they merely clarify that the respective features are within the wireless communications device (as was previously recited via the preamble).

Please charge any shortage in fees due in connection with the filing of this, concurrent and future replies, including extension of time fees, to Deposit Account 16-0607 and please credit any excess fees to such deposit account.

Respectfully submitted,
